

### CROSS CUTTING MACHINE **FOR ABRASIVE MATERIAL:**

The discs for cross cutting machine are used for squaring the beginning and end of the strips of marble and granite and they should guaranteed ensure a fast and clean cut.

TENAX produces a "single layer-double radius" type segment with different formulations depending on the material to be treated, the type of machine and the operator's needs.

**MATERIAL:** Abrasive material

Diameter mm	Narrow tooth	Wide tooth	Segment's dimensions (L x S x H mm)
300	21	18	35 - 2.8 - 8/15
350	25	21	35 - 3.2 - 8/15
400	28	24	35 - 3.5 - 8/15

#### Help us to serve you

To take advantage of the productivity of your machines you need the right tool. Having it is easy: communicate to technical staff the necessary parameters and they give you the best solution.

#### We need to know:

Characteristics of the machine - Cutting mode - Material to be processed - Working parameters - Information about the application - Diameter - Bore - Core type (standard - silent - laser)

The dimensions shown are standard, our production department is able to produce the dimensions for every need.

**YOU DON'T HAVE ADAPT TO THE PRODUCTS, BUT WE DEVELOP OUR TOOLS FOR YOUR NEEDS.**
