

CROSS CUTTING MACHINE **FOR GRANITE:**

The discs for cross cutting machine are used for squaring the beginning and end of the strips of marble and granite and they should guaranteed ensure a fast and clean cut.

TENAX produces a "single layer-double radius" type segment with different formulations depending on the material to be treated, the type of machine and the operator's needs.

MATERIAL: Granite

Diameter mm	Narrow tooth	Wide tooth	Segment's dimensions (L x S x H mm)
300	21	18	40 - 2.8/3,2 - 10/12/18
350	25	21	40 - 3,2 - 10/12/18
400	28	24	40 - 3,6 - 10/12/18

Help us to serve you

To take advantage of the productivity of your machines you need the right tool. Having it is easy: communicate to technical staff the necessary parameters and they give you the best solution.

We need to know:

Characteristics of the machine - Cutting mode - Material to be processed - Working parameters - Information about the application - Diameter - Bore - Core type (standard - silent - laser)

The dimensions shown are standard, our production department is able to produce the dimensions for every need.

YOU DON'T HAVE ADAPT TO THE PRODUCTS, BUT WE DEVELOP OUR TOOLS FOR YOUR NEEDS.
